

Feel / Compare and Contrast

COMPARE AND CONTRAST

Covid

Age Range: 14-16 years

Aim: Compare and contrast information on the impact of COVID-19 in the 15 countries where the Itaka-Escolapios Foundation is present.

Activity Development:

The “Restart to Transform” (*Reiniciando para transformar*) solidarity campaign is presented. The presentation is to include an explanation of the current health, economic, and humanitarian crisis triggered by the coronavirus pandemic. The Itaka-Escolapios projects that have been adversely affected in the 16 countries where the foundation is present are also to be mentioned.

A “Compare and Contrast” activity is set out. Students are given a table with the 16 countries where Itaka-Escolapios is present and the information they have to search for:

- COVID-19 incidence rate
- Human Development Index (HDI)

- Physicians density per capita
- Hospital beds per capita
- Any other information considered appropriate.

Students are to search for the information requested using the links that will be provided on the website. The activity can be carried out individually or in pairs, with the 16 countries divided among the class.

They are to collate and analyze the information collected in the table. Then, conclusions are to be drawn as a group, in an attempt to foster reflection and encourage the contribution of ideas in favor of solidarity.
