

1,2,4! (About volunteering in Venezuela)

To better analyse the project and reflect on the video, we will launch a series of questions. To answer these questions, we will use the 1, 2, 4! method:

- First we answer them individually (2 minutes).
- Secondly, we get together in pairs, we tell the other partner what we have put and between the two of us we decide on a common answer that brings together the best of each contribution (5 minutes).
- We will share them with the rest of the class (10 minutes).

We will ask the following questions:

Do we think their way of working is good?

- + Yes, because...
- + No, because...

What did we like the most (only two answers)?

- + 1: What I liked the most is ...
- + 2: The second thing I liked the most is...

What can we learn from their way of "sharing life"?

- + From all that they have shared, what I have learnt is...

Is there anything from what they have presented to us that would be good to implement in our school?

- + What I would also like to see in my school is ...
